About us

APRIL (AI-Powered Responsive Intelligent Legal Assistant) is an advanced legal tech platform designed to make legal support more accessible, efficient, and affordable. Users can ask legal questions through voice or text and receive instant, accurate responses powered by cutting-edge AI. Beyond offering AI-generated guidance, APRIL seamlessly connects users to qualified legal professionals for deeper consultation—via chat or phone—ensuring human expertise is just a step away.

APRIL also aspires to become a comprehensive ecosystem for legal professionals and firms. Our platform will enable law practices to:

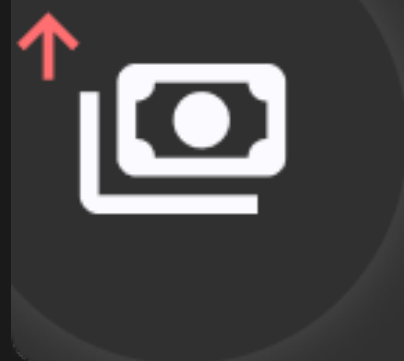

- Track and manage ongoing cases
- Draft contracts with intelligent templates
- Communicate securely with clients
- Conduct legal research and publish insights
- Build a presence through a dedicated social media network for lawyers

Whether you're an individual seeking legal clarity or a law firm looking to streamline operations, APRIL is the future of legal engagement—intelligent, interactive, and inclusive.

The Problem

Millions of people in India and globally face challenges in accessing reliable, affordable, and understandable legal help. Key problems include :

High cost of legal services

Limited access to verified legal information

Lack of multilingual legal support

Inaccessibility in rural and Tier 2/3 areas

Overwhelming legal jargon

Lack of tech-first tools for legal discovery, drafting and assistance

Existing Apps

Millions of people in India and globally face challenges in accessing reliable, affordable, and understandable legal help. Key problems include :

LawRato

High cost of legal services

LegalKart

Document review & consultation only, no AI-based generation or NLP features

MyAdvo

Legal service aggregator with manual workflows, no real-time AI engagement

iLegalEdge, VakilSearch, etc

Provide legal services but focus on compliance, not interaction

No current applications provide the following features:

- Real-time voice query interactions
- Multilingual, AI-powered legal conversations
- A platform where lawyers and clients can collaborate, with AI serving as an assistant

The Solution

APRIL is a Voice-first AI-powered legal advisor built to democratize law. It enables:

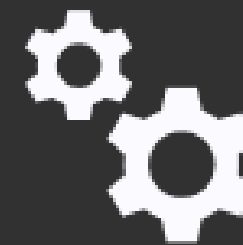

On-demand, AI-powered legal conversations in multiple languages

Communication through speech (coming soon), removing literacy barriers

Legally structured responses vetted by expert lawyers (future-ready)

Tools for lawyers to research, generate documents, track cases, and engage with clients seamlessly

Integration with court data and systems for real-time case intelligence

The Product

A smart , scalable AI Platform that serves :

End Users

Legal advice through AI-powered chat or (soon) voice assistants in vernacular languages

Lawyers

An AI-augmented dashboard that generates briefs, responds to clients, and drafts documents

Businesses and SMEs

Generate Contracts, Connect with Lawyers, Validate Contracts

Product Features

1.Domain-specific Legal Agents (Corporate Law, Tax, Criminal, Civil, Family, etc.)

2.AI-powered legal response generator via chat (voice indevelopment)

3.Multi-language interface (English, Hindi, Tamil ready – more coming)

4.Document drafting engine with editable outputs

5.API-integrated court case fetcher & status updates

6.Lawyer-side dashboard with AI research assistant, calendar, and client communication

7.Agentic workflows for cross-domain reasoning (in roadmap)

 Contract Analysis

 Contract Drafting

Viswesh S Madhav

Viswesh is a young, dynamic, and passionate entrepreneur with a vision to build impactful and affordable technology solutions. He is the Founder and CEO of Humanoid Systems. Private Limited, a company committed to empowering businesses through cutting-edge AI solutions and application development. Viswesh holds an advanced certification in Artificial Intelligence and Machine Learning from IIT-Hyderabad and strongly believes in the philosophy of "Let's Grow Together. " This ethos reflects in his approach to creating win-win partnerships where both clients and the company benefit through world-class services offered at the most affordable prices in the market. With over 7 years of experience in leading cross-functional teams across domains like AI, software development, mobility, and logistics, Viswesh has successfully built sustainable and scalable tech ecosystems. He has led initiatives like: Setting up a ride-hailing and logistics platform in Guwahati, aiming to deliver a hyperlocal alternative to global giants while keeping local affordability and convenience in mind. Establishing a robust competitor to Uber and Bolt in Nigeria, where he played a key role in building the foundation of an AI-powered mobility and delivery ecosystem tailored to regional needs. His contributions to the tech and startup community have been widely recognized. He has been a speaker at events like Google I/O 2018 Extended, and a guest on All India Radio, Bengaluru, discussing his entrepreneurial journey. He has also served as a judge at various startup pitch competitions and university fests, offering insights to budding founders and innovators. Viswesh's entrepreneurial drive began early. At the age of 16, he founded Lending Hands, an NGO that raised over ₹10 lakhs from corporate partners to support Chennai flood relief efforts. During the 2020 lockdown, he personally contributed by distributing food to those in need around Bengaluru. Above all, Viswesh is driven by a mission to make technology affordable, accessible, and transformative, enabling individuals and businesses alike to thrive in the digital age.

A results-oriented Business Leader and Growth Strategist bringing over two decades of impactful experience in transforming organizations across diverse industries. Proven ability to architect and execute strategies that drive sustainable growth and consistently deliver exceptional Return on Investment (ROI). An entrepreneurial mindset coupled with strong sales leadership acumen enables a unique perspective on identifying opportunities and building high-performing teams.
